Vietnam - VN

An Giang - get the first digit and search the equivalence								
1 = 10,104	2 = 10,105							
Gia Lai - get the first digit and search the equivalence								
1 = 12,107	2 = 12,108	3 = 13,107	4 = 13,108	5 = 14,107	6 = 14,108			
Hau Giang - put the first part in box LA1 and second part in box LO1								
1 = 9,105								
Ho Chi Minh City - get the first digit and search the equivalence								
1 = 10,106	2 = 10,107	3 = 11,106	4 = 11,107					
Kon Tum - get the first digit and search the equivalence								
1 = 14,107	2 = 14,108	3 = 15,107	4 = 15,108					
Long An - get the first digit and search the equivalence								
1 = 10,105	2 = 10,106	3 = 11,105	4 = 11,106					
Can Tho - get the first digit and search the equivalence								
1 = 9,105	2 = 10,105							
Ha Noi - get the first digit and search the equivalence								
1 = 20,105	2 = 20,106	3 = 21,105	4 = 21,106					
Hai Phong - get the first digit and search the equivalence								
1 = 20,106	2 = 20,107	3 = 21,106	4 = 21,107					
Da Nang - get the first digit and search the equivalence								
1 = 15,107	2 = 15,108	3 = 16,107	4 = 16,108					
Ba Ria-Vung Tau - get the first digit and search the equivalence								
1 = 10,106	2 = 10,107							
Binh Duong - get the first digit and search the equivalence								
1 = 10,106	2 = 11,106							
Binh Phuoc - get the first digit and search the equivalence								
1 = 11,106	2 = 11,107	3 = 12,106	4 = 12,107					
Binh Thuan - get the first digit and search the equivalence								
1 = 9,107	2 = 9,108	3 = 9,109	4 = 10,107	5 = 10,108	6 = 10,109	7 = 11,107	8 = 11,108	9 = 11,109
Binh Dinh - get the first digit and search the equivalence								
1 = 13,108	2 = 13,109	3 = 14,108	4 = 14,109					
Bac Lieu - get the first digit and search the equivalence								
1 = 8,105	2 = 8,106	3 = 9,105	4 = 9,106					
Bac Giang - get the first digit and search the equivalence								
1 = 21,105	2 = 21,106	3 = 21,107						
Bac Kan - get the first digit and search the equivalence								
1 = 21,105	2 = 21,106	3 = 22,105	4 = 22,106					
Bac Ninh - get the first digit and search the equivalence								
1 = 20,105	2 = 20,106	3 = 21,105	4 = 21,106					
Ben Tre - get the first digit and search the equivalence								
1 = 9,106	2 = 10,106							
Cao Bang - get the first digit and search the equivalence								
1 = 22,105	2 = 22,106	3 = 23,105	4 = 23,106					
Ca Mau - get the first digit and search the equivalence								
1 = 8,104	2 = 8,105	3 = 9,104	4 = 9,105					
Ha Giang - get the first digit and search the equivalence								
1 = 22,104	2 = 22,105	3 = 23,104	4 = 23,105					
Ha Nam - get the first digit and search the equivalence								
1 = 20,105	2 = 20,106							
Ha Tinh - get the first digit and search the equivalence								
1 = 17,105	2 = 17,106	3 = 18,105	4 = 18,106					
Hoa Binh - get the first digit and search the equivalence								
1 = 20,104	2 = 20,105	3 = 21,104	4 = 21,105					
Hung Yen - get the first digit and search the equivalence								
1 = 20,105	2 = 20,106	3 = 21,105	4 = 21,106					
Hai Duong - get the first digit and search the equivalence								
1 = 20,106	2 = 21,106							
Khanh Hoa - get the first digit and search the equivalence								
1 = 11,108	2 = 11,109	3 = 12,108	4 = 12,109					
Kien Giang - get the first digit and search the equivalence								
1 = 9,104	2 = 9,105	3 = 10,104	4 = 10,105					
Lai Chau - get the first digit and search the equivalence								
1 = 21,102	2 = 21,103	3 = 22,102	4 = 22,103					
Lao Cai - get the first digit and search the equivalence								
1 = 21,103	2 = 21,104	3 = 22,103	4 = 22,104					
Lam Dong - get the first digit and search the equivalence								
1 = 11,107	2 = 11,108	3 = 12,107	4 = 12,108					
Lang Son - get the first digit and search the equivalence								
1 = 21,106	2 = 21,107	3 = 22,106	4 = 22,107					
Nam Dinh - get the first digit and search the equivalence								
1 = 19,105	2 = 19,106	3 = 20,105	4 = 20,106					
Nghe An - get the first digit and search the equivalence								
1 = 18,103	2 = 18,104	3 = 18,105	4 = 19,103	5 = 19,104	6 = 19,105			
Ninh Binh - get the first digit and search the equivalence								

1 = 19,105	2 = 19,106	3 = 20,105	4 = 20,106					
Ninh Thuan - get the first digit and search the equivalence								
1 = 11,108	2 = 11,109	3 = 12,108	4 = 12,109					
Phu Tho - get the first digit and search the equivalence								
1 = 20,104	2 = 20,105	3 = 21,104	4 = 21,105					
Phu Yen - get the first digit and search the equivalence								
1 = 12,108	2 = 12,109	3 = 13,108	4 = 13,109					
Quang Binh - get the first digit and search the equivalence								
1 = 16,105	2 = 16,106	3 = 17,105	4 = 17,106	5 = 18,105	6 = 18,106			
Quang Nam - get the first digit and search the equivalence								
1 = 14,107	2 = 14,108	3 = 15,107	4 = 15,108	5 = 16,107	6 = 16,108			
Quang Ngai - get the first digit and search the equivalence								
1 = 14,108	2 = 14,109	3 = 15,108	4 = 15,109					
Quang Ninh - get the first digit and search the equivalence								
1 = 20,106	2 = 20,107	3 = 20,108	4 = 21,106	5 = 21,107	6 = 21,108			
Quang Tri - get the first digit and search the equivalence								
1 = 16,106	2 = 16,107	3 = 17,106	4 = 17,107					
Soc Trang - get the first digit and search the equivalence								
1 = 9,105	2 = 9,106							
Son La - get the first digit and search the equivalence								
1 = 20,103	2 = 20,104	3 = 20,105	4 = 21,103	5 = 21,104	6 = 21,105	7 = 22,103	8 = 22,104	9 = 22,105
Thanh Hoa - get the first digit and search the equivalence								
1 = 19,104	2 = 19,105	3 = 19,106	4 = 20,104	5 = 20,105	6 = 20,106			
Thai Binh - put the first part in box LA1 and second part in box LO1								
1 = 20,106								
Thai Nguyen - get the first digit and search the equivalence								
1 = 21,105	2 = 21,106	3 = 22,105	4 = 22,106					
Thua Thien-Hue - get the first digit and search the equivalence								
1 = 15,107	2 = 15,108	3 = 16,107	4 = 16,108					
Tien Giang - get the first digit and search the equivalence								
1 = 10,105	2 = 10,106							
Tra Vinh - get the first digit and search the equivalence								
1 = 9,105	2 = 9,106	3 = 10,105	4 = 10,106					
Tuyen Quang - get the first digit and search the equivalence								
1 = 21,104	2 = 21,105	3 = 22,104	4 = 22,105					
Tay Ninh - get the first digit and search the equivalence								
1 = 10,105	2 = 10,106	3 = 11,105	4 = 11,106					
Vinh Long - get the first digit and search the equivalence								
1 = 9,105	2 = 9,106	3 = 10,105	4 = 10,106					
Vinh Phuc - put the first part in box LA1 and second part in box LO1								
1 = 21,105								
Yen Bai - get the first digit and search the equivalence								
1 = 21,103	2 = 21,104	3 = 21,105	4 = 22,103	5 = 22,104	6 = 22,105			
Tinh Dien Bien - get the first digit and search the equivalence								
1 = 20,102	2 = 20,103	3 = 21,102	4 = 21,103	5 = 22,102	6 = 22,103			
Dac Lak - get the first digit and search the equivalence								
1 = 12,107	2 = 12,108	3 = 13,107	4 = 13,108					
Dong Nai - get the first digit and search the equivalence								
1 = 10,106	2 = 10,107	3 = 11,106	4 = 11,107					
Dong Thap - put the first part in box LA1 and second part in box LO1								
1 = 10,105								
Dak Nong - get the first digit and search the equivalence								
1 = 11,107	2 = 11,108	3 = 12,107	4 = 12,108
