

Switzerland - CH

Aargau - get the first digit and search the equivalence					
1 = 47,7	2 = 47,8				
Appenzell Ausserrhoden - put the first part in box LA1 and second part in box LO1					
1 = 47,9					
Appenzell Innerrhoden - put the first part in box LA1 and second part in box LO1					
1 = 47,9					
Basel-City - put the first part in box LA1 and second part in box LO1					
1 = 47,7					
Basel-Landschaft - put the first part in box LA1 and second part in box LO1					
1 = 47,7					
Bern - get the first digit and search the equivalence					
1 = 46,6	2 = 46,7	3 = 46,8	4 = 47,6	5 = 47,7	6 = 47,8
Grisons - get the first digit and search the equivalence					
1 = 46,8	2 = 46,9	3 = 46,10	4 = 47,8	5 = 47,9	6 = 47,10
Fribourg - get the first digit and search the equivalence					
1 = 46,6	2 = 46,7	3 = 47,6	4 = 47,7		
Geneva - get the first digit and search the equivalence					
1 = 46,5	2 = 46,6				
Glarus - get the first digit and search the equivalence					
1 = 46,8	2 = 46,9	3 = 47,8	4 = 47,9		
Jura - get the first digit and search the equivalence					
1 = 47,6	2 = 47,7				
Lucerne - get the first digit and search the equivalence					
1 = 46,7	2 = 46,8	3 = 47,7	4 = 47,8		
Neuchatel - get the first digit and search the equivalence					
1 = 46,6	2 = 46,7	3 = 47,6	4 = 47,7		
Nidwalden - get the first digit and search the equivalence					
1 = 46,8	2 = 47,8				
Obwalden - put the first part in box LA1 and second part in box LO1					
1 = 46,8					
Saint Gallen - get the first digit and search the equivalence					
1 = 46,8	2 = 46,9	3 = 47,8	4 = 47,9		
Schaffhausen - put the first part in box LA1 and second part in box LO1					
1 = 47,8					
Schwyz - get the first digit and search the equivalence					
1 = 46,8	2 = 46,9	3 = 47,8	4 = 47,9		
Solothurn - get the first digit and search the equivalence					
1 = 47,7	2 = 47,8				
Thurgau - get the first digit and search the equivalence					
1 = 47,8	2 = 47,9				
Ticino - get the first digit and search the equivalence					
1 = 45,8	2 = 45,9	3 = 46,8	4 = 46,9		
Uri - put the first part in box LA1 and second part in box LO1					
1 = 46,8					
Valais - get the first digit and search the equivalence					
1 = 45,6	2 = 45,7	3 = 45,8	4 = 46,6	5 = 46,7	6 = 46,8
Vaud - get the first digit and search the equivalence					
1 = 46,6	2 = 46,7				
Zug - put the first part in box LA1 and second part in box LO1					
1 = 47,8					
Zurich - put the first part in box LA1 and second part in box LO1					
1 = 47,8
