

# Guatemala - GT

Alta Verapaz - get the first digit and search the equivalence								
1 = 15,-90	2 = 15,-89	3 = 16,-90	4 = 16,-89					
Baja Verapaz - get the first digit and search the equivalence								
1 = 14,-90	2 = 14,-89	3 = 15,-90	4 = 15,-89					
Chimaltenango - get the first digit and search the equivalence								
1 = 14,-91	2 = 14,-90							
Chiquimula - put the first part in box LA1 and second part in box LO1								
1 = 14,-89								
El Progreso - get the first digit and search the equivalence								
1 = 14,-90	2 = 14,-89	3 = 15,-90	4 = 15,-89					
Escuintla - get the first digit and search the equivalence								
1 = 13,-91	2 = 13,-90	3 = 14,-91	4 = 14,-90					
Guatemala - put the first part in box LA1 and second part in box LO1								
1 = 14,-90								
Huehuetenango - get the first digit and search the equivalence								
1 = 15,-92	2 = 15,-91	3 = 15,-90	4 = 16,-92	5 = 16,-91	6 = 16,-90			
Izabal - get the first digit and search the equivalence								
1 = 15,-89	2 = 15,-88							
Jalapa - get the first digit and search the equivalence								
1 = 14,-90	2 = 14,-89							
Jutiapa - get the first digit and search the equivalence								
1 = 13,-90	2 = 13,-89	3 = 14,-90	4 = 14,-89					
Quetzaltenango - get the first digit and search the equivalence								
1 = 14,-92	2 = 14,-91	3 = 15,-92	4 = 15,-91					
Retalhuleu - get the first digit and search the equivalence								
1 = 14,-92	2 = 14,-91							
Sacatepequez - put the first part in box LA1 and second part in box LO1								
1 = 14,-90								
San Marcos - get the first digit and search the equivalence								
1 = 14,-92	2 = 14,-91	3 = 15,-92	4 = 15,-91					
Santa Rosa - get the first digit and search the equivalence								
1 = 13,-90	2 = 14,-90							
Solola - put the first part in box LA1 and second part in box LO1								
1 = 14,-91								
Totonicapan - get the first digit and search the equivalence								
1 = 14,-91	2 = 15,-91							
Zacapa - get the first digit and search the equivalence								
1 = 14,-89	2 = 15,-89							
Peten - get the first digit and search the equivalence								
1 = 15,-91	2 = 15,-90	3 = 15,-89	4 = 16,-91	5 = 16,-90	6 = 16,-89	7 = 17,-91	8 = 17,-90	9 = 17,-89
Quiche - get the first digit and search the equivalence								
1 = 14,-91	2 = 14,-90	3 = 15,-91	4 = 15,-90	5 = 16,-91	6 = 16,-90			
Suchitepeque - put the first part in box LA1 and second part in box LO1								
1 = 14,-91
