

Cambodia - KH

Banteay Meanchey - get the first digit and search the equivalence										
1 = 13,102	2 = 13,103	3 = 14,102	4 = 14,103							
Battambang - get the first digit and search the equivalence										
1 = 12,102	2 = 12,103	3 = 13,102	4 = 13,103							
Kampong Cham - get the first digit and search the equivalence										
1 = 11,104	2 = 11,105	3 = 12,104	4 = 12,105							
Kampong Chhnang - get the first digit and search the equivalence										
1 = 11,104	2 = 12,104									
Kampong Speu - get the first digit and search the equivalence										
1 = 11,103	2 = 11,104	3 = 12,103	4 = 12,104							
Kampong Thom - get the first digit and search the equivalence										
1 = 12,104	2 = 12,105	3 = 13,104	4 = 13,105							
Kampot - get the first digit and search the equivalence										
1 = 9,103	2 = 9,104	3 = 10,103	4 = 10,104	5 = 11,103	6 = 11,104					
Kandal - get the first digit and search the equivalence										
1 = 10,104	2 = 10,105	3 = 11,104	4 = 11,105							
Kep - put the first part in box LA1 and second part in box LO1										
1 = 10,104										
Koh Kong - get the first 2 digits and search their equivalence										
01 = 9,102	02 = 9,103	03 = 9,104	04 = 10,102	05 = 10,103	06 = 10,104	07 = 11,102	08 = 11,103	09 = 11,104	10 = 12,102	11 = 12,103
12 = 12,104										
Kratie - get the first digit and search the equivalence										
1 = 11,105	2 = 11,106	3 = 12,105	4 = 12,106	5 = 13,105	6 = 13,106					
Mondolkiri - get the first digit and search the equivalence										
1 = 12,106	2 = 12,107	3 = 13,106	4 = 13,107							
Pailin - get the first digit and search the equivalence										
1 = 12,102	2 = 13,102									
Phnom Penh - put the first part in box LA1 and second part in box LO1										
1 = 11,104										
Preah Sihanouk - get the first digit and search the equivalence										
1 = 9,102	2 = 9,103	3 = 9,104	4 = 10,102	5 = 10,103	6 = 10,104	7 = 11,102	8 = 11,103	9 = 11,104		
Preah Vihear - get the first digit and search the equivalence										
1 = 13,104	2 = 13,105	3 = 14,104	4 = 14,105							
Prey Veng - get the first digit and search the equivalence										
1 = 10,105	2 = 11,105									
Pursat - get the first digit and search the equivalence										
1 = 11,102	2 = 11,103	3 = 11,104	4 = 12,102	5 = 12,103	6 = 12,104	7 = 13,102	8 = 13,103	9 = 13,104		
Ratanakiri - get the first digit and search the equivalence										
1 = 13,106	2 = 13,107	3 = 14,106	4 = 14,107							
Siem Reap - get the first digit and search the equivalence										
1 = 12,103	2 = 12,104	3 = 13,103	4 = 13,104	5 = 14,103	6 = 14,104					
Stung Treng - get the first digit and search the equivalence										
1 = 13,105	2 = 13,106	3 = 14,105	4 = 14,106							
Svay Rieng - get the first digit and search the equivalence										
1 = 10,105	2 = 10,106	3 = 11,105	4 = 11,106							
Takeo - get the first digit and search the equivalence										
1 = 10,104	2 = 10,105	3 = 11,104	4 = 11,105							
Otar Meanchey - get the first digit and search the equivalence										
1 = 13,103	2 = 13,104	3 = 14,103	4 = 14,104
