

# South Korea - KR

Busan - get the first digit and search the equivalence											
1 = 34,128	2 = 34,129	3 = 35,128	4 = 35,129								
Chungcheongbuk-do - get the first digit and search the equivalence											
1 = 36,127	2 = 36,128	3 = 37,127	4 = 37,128								
Chungcheongnam-do - get the first digit and search the equivalence											
1 = 35,125	2 = 35,126	3 = 35,127	4 = 36,125	5 = 36,126	6 = 36,127	7 = 37,125	8 = 37,126	9 = 37,127			
Daegu - get the first digit and search the equivalence											
1 = 35,128	2 = 36,128										
Daejeon - put the first part in box LA1 and second part in box LO1											
1 = 36,127											
Gangwon-do - get the first digit and search the equivalence											
1 = 37,127	2 = 37,128	3 = 37,129	4 = 38,127	5 = 38,128	6 = 38,129						
Gwangju - get the first digit and search the equivalence											
1 = 35,126	2 = 35,127										
Gyeonggi-do - get the first digit and search the equivalence											
1 = 36,126	2 = 36,127	3 = 37,126	4 = 37,127	5 = 38,126	6 = 38,127						
Gyeongsangbuk-do - get the first 2 digits and search their equivalence											
01 = 35,127	02 = 35,128	03 = 35,129	04 = 35,130	05 = 36,127	06 = 36,128	07 = 36,129	08 = 36,130	09 = 37,127	10 = 37,128	11 = 37,129	12 = 37,130
Gyeongsangnam-do - get the first digit and search the equivalence											
1 = 34,127	2 = 34,128	3 = 34,129	4 = 35,127	5 = 35,128	6 = 35,129						
Incheon - get the first digit and search the equivalence											
1 = 37,124	2 = 37,125	3 = 37,126									
Jeju-do - get the first digit and search the equivalence											
1 = 33,126	2 = 34,126										
Jeollabuk-do - get the first digit and search the equivalence											
1 = 35,125	2 = 35,126	3 = 35,127	4 = 36,125	5 = 36,126	6 = 36,127						
Jeollanam-do - get the first digit and search the equivalence											
1 = 33,125	2 = 33,126	3 = 33,127	4 = 34,125	5 = 34,126	6 = 34,127	7 = 35,125	8 = 35,126	9 = 35,127			
Seoul - get the first digit and search the equivalence											
1 = 37,126	2 = 37,127										
Ulsan - get the first digit and search the equivalence											
1 = 35,128	2 = 35,129
