

Bhutan - BT

Bumthang - get the first digit and search the equivalence					
1 = 27,90	2 = 27,91	3 = 28,90	4 = 28,91		
Chhukha - get the first digit and search the equivalence					
1 = 26,89	2 = 27,89				
Daga - get the first digit and search the equivalence					
1 = 26,89	2 = 26,90	3 = 27,89	4 = 27,90		
Gasa - get the first digit and search the equivalence					
1 = 27,89	2 = 27,90	3 = 28,89	4 = 28,90		
Ha - get the first digit and search the equivalence					
1 = 27,88	2 = 27,89				
Lhuntshi - get the first digit and search the equivalence					
1 = 27,90	2 = 27,91	3 = 28,90	4 = 28,91		
Mongar - get the first digit and search the equivalence					
1 = 26,90	2 = 26,91	3 = 27,90	4 = 27,91		
Paro - put the first part in box LA1 and second part in box LO1					
1 = 27,89					
Pemagatsel - get the first digit and search the equivalence					
1 = 26,91	2 = 27,91				
Punakha - get the first digit and search the equivalence					
1 = 27,89	2 = 27,90				
Samdrup Jongkhar - get the first digit and search the equivalence					
1 = 26,90	2 = 26,91	3 = 26,92	4 = 27,90	5 = 27,91	6 = 27,92
Samchi - get the first digit and search the equivalence					
1 = 26,88	2 = 26,89	3 = 27,88	4 = 27,89		
Geylegphug - get the first digit and search the equivalence					
1 = 26,89	2 = 26,90	3 = 27,89	4 = 27,90		
Thimphu - put the first part in box LA1 and second part in box LO1					
1 = 27,89					
Trashi Yangste - put the first part in box LA1 and second part in box LO1					
1 = 27,91					
Tashigang - get the first digit and search the equivalence					
1 = 27,91	2 = 27,92				
Tongsa - put the first part in box LA1 and second part in box LO1					
1 = 27,90					
Chirang - get the first digit and search the equivalence					
1 = 26,90	2 = 27,90				
Wangdi Phodrang - get the first digit and search the equivalence					
1 = 27,89	2 = 27,90	3 = 28,89	4 = 28,90		
Shemgang - get the first digit and search the equivalence					
1 = 26,90	2 = 26,91	3 = 27,90	4 = 27,91
