

North Korea - KP

Chagang-do - get the first digit and search the equivalence										
1 = 39,125	2 = 39,126	3 = 39,127	4 = 40,125	5 = 40,126	6 = 40,127	7 = 41,125	8 = 41,126	9 = 41,127		
Hamgyong-bukto - get the first 2 digits and search their equivalence										
01 = 40,128	02 = 40,129	03 = 40,130	04 = 41,128	05 = 41,129	06 = 41,130	07 = 42,128	08 = 42,129	09 = 42,130	10 = 43,128	11 = 43,129
12 = 43,130										
Hamgyong-namdo - get the first 2 digits and search their equivalence										
01 = 39,126	02 = 39,127	03 = 39,128	04 = 39,129	05 = 40,126	06 = 40,127	07 = 40,128	08 = 40,129	09 = 41,126	10 = 41,127	11 = 41,128
12 = 41,129										
Hwanghae-bukto - get the first digit and search the equivalence										
1 = 37,125	2 = 37,126	3 = 37,127	4 = 38,125	5 = 38,126	6 = 38,127	7 = 39,125	8 = 39,126	9 = 39,127		
Hwanghae-namdo - get the first digit and search the equivalence										
1 = 37,124	2 = 37,125	3 = 37,126	4 = 38,124	5 = 38,125	6 = 38,126					
Kangwon-do - get the first digit and search the equivalence										
1 = 38,126	2 = 38,127	3 = 38,128	4 = 39,126	5 = 39,127	6 = 39,128					
Pyongyang - get the first digit and search the equivalence										
1 = 38,125	2 = 38,126	3 = 39,125	4 = 39,126							
P'yongan-bukto - get the first digit and search the equivalence										
1 = 39,124	2 = 39,125	3 = 39,126	4 = 40,124	5 = 40,125	6 = 40,126					
P'yongan-namdo - get the first digit and search the equivalence										
1 = 38,125	2 = 38,126	3 = 38,127	4 = 39,125	5 = 39,126	6 = 39,127	7 = 40,125	8 = 40,126	9 = 40,127		
Rason - put the first part in box LA1 and second part in box LO1										
1 = 42,130										
Yanggang-do - get the first 2 digits and search their equivalence										
01 = 40,126	02 = 40,127	03 = 40,128	04 = 40,129	05 = 41,126	06 = 41,127	07 = 41,128	08 = 41,129	09 = 42,126	10 = 42,127	11 = 42,128
12 = 42,129
